# MANUSCRIPTS IN THE DIGITAL AGE: XML-BASED CATALOGUES AND EDITIONS
## DAY 2: TRANSFORMATION SCENARIO

1. Open the XML file you want to transform in Oxygen Editor
2. Click on the wrench with red arrow in the toolbar

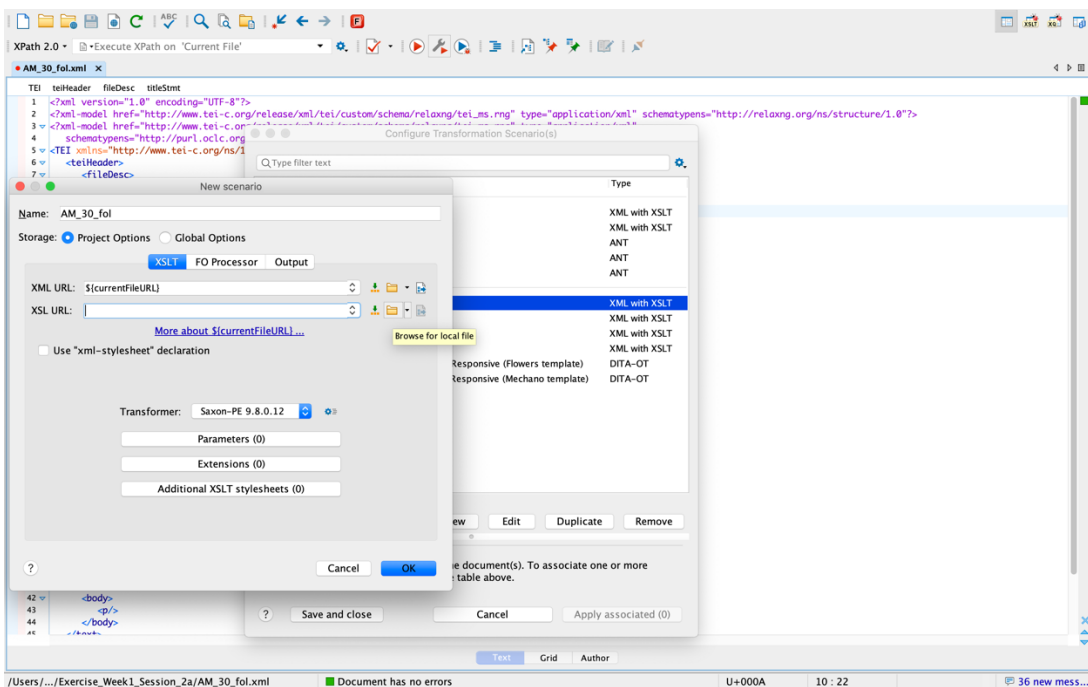

3. A pop-up window will open
4. Click on "new" button

5. A drop-down menu will open
6. Choose "XML transformation with XSLT"

7. A new pop-up window will open
8. By the field XSL URL click on the browsing icon

9. Select the location of your XSLT
10. Click on the "Output" button

11. Tick "Save as" option and type the name of your output file: out.html

12. Tick "Open in Browser" option
13. Click OK

14. Now you are back to the first pop-up window
15. Tick the transformation scenario you've just created "AM_30_fol"
16. Click "Apply associated"

17. A new HTML file will appear in your folder and its contents will be displayed in the browser
